☎ +91-8318574536 — ✉ aaryan.tiwari54@gmail.com — LinkedIn: linkedin.com/in/aryan-tiwari-shade
GitHub: github.com/primexshade

Skills

Languages: Java, JavaScript (ES6+), C, C++

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Socket.io

Frontend: React.js, Tailwind CSS

Databases: MongoDB, MySQL, Schema Design, Indexing

Cloud & Tools: AWS (EC2, S3, RDS), Git, GitHub, Linux

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Education

B.Tech — Computer Science and Engineering

2023 – Present

SRM Institute of Science and Technology, NCR Campus

CGPA: 8.03 — Current Semester GPA: 9.05

Class XII — ISC Board (PCM + Computer Science)

2022

City Montessori School, Lucknow

Percentage: 91%

Projects

Chitkaar — Complaint Management Platform | Node.js, MongoDB, JWT, AWS

2026

- Architected and deployed a complaint management platform for an NGO, serving **active production traffic** with role-based workflows across citizens, NGO staff, and administrators.
- Implemented **JWT + RBAC** authentication supporting 3 user roles with distinct permission scopes and protected API routes.
- Engineered MongoDB schemas and **8+ REST API endpoints** managing complaint lifecycle, status transitions, and resolution workflows.
- Deployed backend services on **AWS EC2 with S3** for asset storage, achieving stable uptime for live NGO operations.

MediPlus — Decentralized Healthcare Platform | Solidity, IPFS, React.js

2025

- Built a decentralized application for medical record storage with patient-controlled access using Ethereum smart contracts.
- Designed smart contracts in Solidity to manage record ownership and access permissions, eliminating single points of failure.
- Integrated **IPFS** for off-chain document storage with on-chain hash verification, reducing on-chain storage costs by ~70%.

Disaster Management System | Node.js, Express.js, MySQL, Socket.io

2025

- Built a web platform for real-time disaster alert broadcasting, resource allocation, and multi-agency coordination.
- Designed REST APIs and role-based access for emergency reporting across 3 user types (admin, responder, public).
- Implemented **Socket.io** event streaming for real-time alert delivery, reducing simulated notification latency by ~60% vs. polling.

Leadership & Achievements

- **Chairperson, GeeksforGeeks Campus Chapter — SRMIST Delhi NCR (2025–26):** Organized **6+ technical events and workshops** attended by 200+ students, coordinating a team of 12 across DSA, cloud, and web development topics.
- **SMART India Hackathon Participant:** Contributed to full-stack system design and real-world problem solving under 36-hour constraints.
